Yearbooks! 2010 Total Digital Program™

Want to design your yearbook using Adobe Photoshop, InDesign, Quark or Acrobat PDF?

No Problem! With our Total Digital Program™ you have can choose your favorite application to design your yearbook.

We have over 60 years of experience in capturing beautiful portraits and creating high quality yearbooks. We look forward to working with you!

For Adobe® Photoshop:

- Set your canvas size to 8.625 x 11.125
- All backgrounds and photos you would like to bleed off the page should extend to the edge of the document
- Keep all text and portraits .3125 from the edge to prevent any unwanted trimming
- Send your finished pages as a PDF

For Adobe® InDesign or Quark:

- Set your page size to 8.5x11
- Set your bleed to 1/16" (on all sides)
- Set your margins to 1/4"
- All backgrounds and photos you would like to bleed off the page should extend at least 1/16" beyond the page edge
- All text and portraits should stay within your 1/4" margin to prevent any unwanted trimming
- Submit your book as a PDF using the Press Quality preset (with the exception of changing the bleed to .0625 on all sides under the Marks and Bleed section of the Export PDF dialog box)

Important Notes & Considerations

Designing a yearbook using the applications requires prior experience. Irvin Simon does not provide end user support for the Total Digital Program. When your PDF is received, it will be taken through a process called preflighting to determine if all of the requirements have been met. You will be notified if your yearbook has failed the pre-flight inspection and it will be returned to you to make the necessary changes. For more information, please visit irvinsimoneyearbooks.com.
